PROFESSIONAL SUMMARY

Result-driven and highly motivated Master of Computer Applications (MCA) graduate with a solid foundation in Full-Stack Software Development, Cloud integration, and Artificial Intelligence applications. Experienced in developing scalable, AI-powered systems and responsive user interfaces using Python, Java, JavaScript, and React. Published researcher in NLP-driven optimization with practical experience building industry-level production architectures. Adept at database design, data structures, and translating product specifications into highly efficient backend systems. Eager to leverage technical expertise to contribute effectively to software engineering teams.

TECHNICAL SKILLS

Languages: Python, Java (Core), JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks/Libs: React.js, Node.js, Express, Bootstrap, Tailwind CSS

AI/ML & NLP: scikit-learn, CountVectorizer, Cosine Similarity, Text Vectorization, NLP Preprocessing Pipelines

Databases: MongoDB, Firebase Firestore, MySQL

Tools & Platforms: Git, GitHub, Firebase Studio, Postman, RESTful APIs, VS Code, Vibe Coding (AI-assisted development with Claude Code, Cursor & Copilot)

Core Concepts: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Data Structures & Algorithms, Database Management Systems (DBMS), Natural Language Processing (NLP)

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Internzlearn

Feb 2026 – May 2026 | Remote

Artificial Intelligence Intern

- Engineered an interactive full-stack Interactive Healthcare AI Chatbot system providing automated triage, baseline medical guidance, and real-time clinical conversation handling.
- Built extensive backend microservice components using Python to process asynchronous natural language queries and handle conversational state sessions efficiently.
- Optimized non-relational document schema inside MongoDB to catalog user verification profiles and multi-session diagnostic lookups securely.
- Configured secure encryption layer standards for internal application programming interfaces (APIs) to maximize platform performance and client data confidentiality.

ACADEMIC PUBLICATIONS & ACHIEVEMENTS

International Journal of Advanced Research in Education and Technology (IJARETY) *Published: June 2026*

Primary Author — ISSN: 2394-2975 | Impact Factor: 9.971

- Published original research paper titled: "Hirely: An AI-Powered Resume Optimization and Job Matching Platform using NLP and Cosine Similarity" (DOI: 10.15680/IJARETY.2026.1303019).
- Developed a unified multi-tier web platform executing Natural Language Processing pipelines to evaluate semantic text constraints against specialized document tokens.
- Designed vector optimization scoring modules achieving a 90% accuracy rate under high-volume load simulation profiles.

TECHNICAL PROJECTS

Hirely: AI-Powered Resume Builder

Independent Project | 2024 – 2026

Technologies: React.js, Node.js, Express, MongoDB, Python, Cosine Similarity, Tailwind CSS

- Architected and implemented a complete three-tier Client-Server application bridging automated job matching pipelines and programmatic text parsing engines.

- Integrated scikit-learn CountVectorizer modules and NLP text preprocessing routines (lowercasing, stop-word elimination, term-frequency vectorization) to compute document similarities.
- Constructed dynamic responsive components using React.js and Tailwind CSS, facilitating live processing score feedback systems and asynchronous file exports.

EDUCATION

CMR Institute of Technology

2024 – 2026 | Bengaluru, India

Master of Computer Applications (MCA) – Computer Science & Applications

National Degree College

2021 – 2024 | Bengaluru, India

Bachelor's Degree (Computer Science Track)

Krupanidhi PU College

2019 – 2020 | Bengaluru, India

Pre-University Course (CEBA)

Little Angels Modern High School

2018 – 2019 | Bengaluru, India

Secondary School Leaving Certificate (SSLC)
